

Environmental Policy Statement

"Sivatech Ltd is committed to the care of the environment and this goal shall be achieved by implementing and maintaining the Environmental Management System BS EN ISO 14001:2004, which relates to its environmental aspects of our activities, products and services.

We will comply with all relevant environmental legislation, regulations and all other legal requirements, which we subscribe to.

We are committed to waste minimisation as the cornerstone of our policy.

Waste reduction provides long term benefits in two ways. Firstly, it is an investment in a safe clean environment, and secondly, it is good business.

An Environmental Management System Manual has been implemented and is maintained, reflecting the aims of our Company and demonstrating a commitment to continual improvement and prevention of pollution where appropriate.

Procedures have been put in place that provide the framework for setting and reviewing environmental objectives and targets and shall be maintained by regular series of internal audits, an annual management review and independent external audits by recognised bodies and in some instances, our customers themselves.

Our policy is documented, implemented, and maintained. It has been communicated to all persons working for or on behalf of the organisation, and is available to the public on request.

It is the responsibility of all employees, to support and apply those sections of our procedures that relate to their activities within our facility."

Ian Watson
